I am filing a letter of protest in regards to the rate increase for multiple reasons....

Reason one is we are not able to afford higher Bill's given the pandemic and president bidens disaster running this country. Gas, wood, food has gone up in cost.

Reason 2.

Palmetto waste water is doing a terrible job providing us service. They do nothing but ask for more money due to there mismanagement of money. Everytime a development is constructed they have to pay a set amount of money to help pay for infrastructure increase and demand. The fact that this company places the money they receive in there general fund and not there infrastructure fund is outrageous. Sure line your pockets with our money and not maintain your company. It's ok sure screw the consumer.

Reason 3

They have a monopoly on the area due to dehec regulations. We cant put in septic tanks. That being said we are forced to pay these ridiculous rate. This is unfair and I'll be damed if I'm going to flush my money down the toilet.

Also I never received a notice of this meeting and just found out about this request just now. Either way I demand more options for sewage service. Maybe it's time people say enough and just stop paying these companies. Enough is enough
People are fed up with these companies screwing us.

Thank for listening and ignoring me while receiving kick backs for approving palmetto waste water request
